P****	December 19, 2013
	Page 2 Page 3
1 APPEARANCES:	1 MR. ILDERTON: This is the
2 Pat Ilderton, Chairperson	2 December 2012 meeting of the Sullivan's Island
3 Steve Herlong, Vice Chairperson	3 Design Review Board. It is now 6:00 o'clock, or a
4 Duke Wright, Board Member	4 little after, and the members in attendance are
5 Rhonda Sanders, Board Member	5 Duke Wright, Pat Ilderton, Steve Herlong, Rhonda
6 Mark Howard, Board Member	6 Sanders, Mark Howard, and Jon Lancton. The
7 Jon Lancto, Board Member	7 Freedom of Information requirements have been met
8 Billy Craver, Board Member	s for this meeting.
9 Kat Kenyon, Permit Tech	9 Approval of
10 Randy Robinson, Building Official	MR. HERLONG: I'd like to amend the
11	11 agenda to add a discussion of potential
12	12 adjustments to the town ordinance and have that
13	13 the last item on the agenda.
14	14 MR. ILDERTON: Okay, great. Do I hear
15	15 a second?
16	16 MS. SANDERS: Second.
17	17 MR. ILDERTON: All right. We'll amend
18	18 the agenda to discuss that on the tail end of our
19	19 meeting.
20	20 And Billy Craver.
21	21 2830 I'on, addition/alteration.
22	MR. ROBINSON: Okay. This is a
23	historic property, 2830 I'on, that's been to y'all
24	24 before. The applicant has some other changes that
25	25 they'd like to make to this property.
	Page 4 Page 5
1 They're asking for some site setback	1 and expanding it and doing a semielevated pool,
2 relief. 8 percent was previously approved.	2 and that was approved, and at that time we got the
3 believe that's all the relief they're asking for.	3 relief from the site setback.
4 Other than that, it's just a historic property.	4 Just in case anybody's curious, I'll
s They're not doing anything to the front of the	
6 property. This is an addition off the rear.	6 We had an elevated terrace on the back
And is the pool included in this,	7 and sort of expanded out the structure that was
8 Justin?	s that's already existing on the property. And this
MR. FERRICK: The pool will be an	9 pool is an elevated pool structure.
in-ground pool. It's really not part of the	One of the things that's unique about
11 application.	11 this property is that the siting of the house is
MR. ROBINSON: But it is a historic	12 basically on the zero lot line on the street side
property, so it'll have to be approved.	13 right-of-way, so there's an enormous amount of
MR. FERRICK: Okay. Then it is part	14 property on this side, so when you do the
15 of the application.	15 calculations, it really kind of prohibits use of
16 MR. ROBINSON: I'll save any comm	ents 16 the lot the way you would think you could use the
17 for after Justin presents.	17 lot.
MR. ILDERTON: All right. Justin?	Now, granted, the house over here is
MR. FERRICK: Justin Ferrick with B	
20 Clowney Design.	20 the last time we ended up getting that 8 percent
This project was before you about a	21 encroachment into that setback, which amounts
22 year ago. We received final approval for a	
23 I've got the application here, just in case	MR. HERLONG: About 3 feet.
24 anybody's curious. But it was taking the exist	<u> </u>
25 semiattached structure on the back of the pr	operty 25 approximately 3 feet.
İ	

	Page 6
1	And so the application before you
2	today is similar in nature. The proposal is to
3	take the pool and put it on the ground. We'll
4	have a garden designed on the ground, which we
5	think is a better application on this property.
б	What's highlighted here is the
7	existing footprint of the existing semiattached
8	structure, which consists of two bedrooms and a
9	bathroom, and the proposal is simply to take that
10	structure from this location off of this and
11	simply rotate it to the back. Now, this is an
12	addition that was done approximately eight years
13	ago, maybe, seven years ago.
14	And so to keep this as an intact
15	structure, pick it up, put it on a new foundation
16	system here, reuse this existing foundation with a
17	new heightened structure in between. And so
18	that's the proposal.

And you can see here that the -- when

20 this house was altered previously, this is a large

22 piece. This is the existing foundation that we're

23 reusing, and this structure here is the structure

24 that we're simply moving from here and rotating

21 roof in the back creating this little connecting

Page 7 So what you end up with in the plan is 2 a semiprotected pool area, again, a gracious 3 distance from the neighboring property, which his 4 house is here. And we really don't have any lot 5 coverage issues. It's a big lot, and this is 6 still a small home, so -- and the additions, we 7 tried -- we think are in scale and in keeping with the existing front house. And as you can see in this picture 10 here, really, the addition, you would just see a 11 little bit of that structure sort of peeking back 12 behind there, and once it's landscaped, it's 13 probably even negligible with regard to how it 14 would read from the street front of the existing 15 house. MR. WRIGHT: That's Fred's old house. 16 MR. FERRICK: Yeah, it is Fred's old 17 18 house. So again, the side setback variance 19 20 was previously approved, and we just used that as 21 our datum line and trying to reuse the existing 22 foundation structure. Yes? 23 MR. HOWARD: When you say just a

25 little bit would be peeking, how much is a little

Page 8 1 bit, and would the pool be visible? MR. FERRICK: Well, the pool would be 3 in the ground. MR. HOWARD: But it would be outside 4 5 the --MR. FERRICK: That is correct. You 7 can see here that it looks -- I'm not -- that is 8 probably about 70 percent of the pool would be 9 peeking back behind here. This dotted line right here is a profile of the front of the house, so 11 you'd have about 10 feet of the structure sticking 12 out back behind there in the distance. But again, that's approximately probably about 100 feet from this front face of this porch, so it's a good ways 15 back. MR. ILDERTON: Great. Thank you. 16 Is there any public comment to this 17 18 application? (No comments.) 19 MR. ILDERTON: Public comment section 20 21 is closed. Randy, anything to add? 22

MR. ROBINSON: No other comment except

for just to make the applicant aware that they

25 have to put a deed restriction on this house so

1 that the extra part will not be rented as a 2 separate dwelling unit, and it can't have a 3 kitchen, but it doesn't show a kitchen or 4 anything, so that shouldn't be a problem. MR. ILDERTON: Duke? MR. WRIGHT: No, I have no comment on 6 7 it. MR. ILDERTON: I'm fine with the 8 proposal. 9 Steve? 10 MR. HERLONG: I think it's a great 11 12 solution. I think it's a way to -- again, it 13 breaks up the massing of the home on the property, 14 it uses part of the unused portion of the 15 property, and it just -- it seems totally 16 appropriate to an older Sullivan's Island 17 residence. MR. ILDERTON: Rhonda? 18 MS. SANDERS: Looks great. 19 20 MR. ILDERTON: Mark? MR. HOWARD: I think it's a job well 21 22 done. MR. LANCTO: Yes. 1 think we're going 23 24 to end up with a very traditional-looking

25 structure there, and it's a great design to add

23

25 around.

24

1	on.	1 structure. They're wanting to do an addition off
2	MR. ILDERTON: Do I hear a motion?	2 of the rear and the side. They're asking for some
3	MD ODAVED II II III II II	3 4.5 feet in side yard setback relief. The plans
4	MR. ILDERTON: I'm sorry.	4 are in front of you. I'll let the applicant
5	MR. CRAVER: That's okay. You just	5 present his plan and save my comment.
6		6 MR. ILDERTON: Yes, sir?
7	MR. ILDERTON: I assumed you were not	7 MR. MCCANTS: Carl McCants here.
1 1	going to be objecting.	8 All right. I think y'all see the
9	MR. HERLONG: I make a motion that we	9 plans. We're looking — the only thing we're
10	t transfer	10 asking for here is this side setback relief. I
11	MS. SANDERS: Second.	11 think it's an 8 percent that we're looking for
12	MR. ILDERTON: Discussion?	there. Other than that, it being a historic
13	All in favor?	13 structure, that's the only other reason that we're
14	MR. WRIGHT: Aye.	13 structure, triat's trie only other reason triat we're
15	MR. ILDERTON: Aye.	<b>∮</b>
	MR. HERLONG: Aye.	15 What we tried to do with this, on the
16	MS. SANDERS; Aye.	16 front elevation of the structure on the main body
17	MR. HOWARD: Aye.	17 of the house, the only thing that we're changing
18	<del>_</del>	18 in the structure is along this front porch.
19	MR. LANCTO: Aye.	originally, it had double doors in each one of
20	MR. CRAVER: Aye.	20 these fenestrations. Now there's windows on these
21	MR. ILDERTON: Thank you, sir.	21 two sides here with entry door here. We're
22	MR. FERRICK: Thank you.	22 wanting to have bring that look back, to have
23	MR. ILDERTON: All right, 2668	them all doors; however, the center one can't be a
24	Jasper, historic/addition.	24 door because an addition that happened in the
25	MR. ROBINSON: 2668, it's a historical	25 past, there's a staircase that comes there. So
-	D 40

2	what we're going to do is it's going to look like	MR. ILDERTON: All right. Jon?
2	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel	1 MR. ILDERTON: All right. Jon? 2 MR. LANCTO: Is the roofing material
3	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.	1 MR. ILDERTON: All right. Jon? 2 MR. LANCTO: Is the roofing material 3 changing from one section to the other here?
2 3 4 5	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?	1 MR. ILDERTON: All right. Jon? 2 MR. LANCTO: Is the roofing material 3 changing from one section to the other here? 4 MR. MCCANTS: No, no.
2 3 4 5	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not	1 MR. ILDERTON: All right. Jon? 2 MR. LANCTO: Is the roofing material 3 changing from one section to the other here? 4 MR. MCCANTS: No, no. 5 MR. LANCTO: That's just for 6 illustration?
2 3 4 5 6 7	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not going to be a front door?	1 MR. ILDERTON: All right. Jon? 2 MR. LANCTO: Is the roofing material 3 changing from one section to the other here? 4 MR. MCCANTS: No, no. 5 MR. LANCTO: That's just for
2 3 4 5 6 7 8	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not going to be a front door?  MR. MCCANTS: No. The front right	1 MR. ILDERTON: All right. Jon? 2 MR. LANCTO: Is the roofing material 3 changing from one section to the other here? 4 MR. MCCANTS: No, no. 5 MR. LANCTO: That's just for 6 illustration? 7 MR. MCCANTS: That's correct, yeah. I
2 3 4 5 6 7 8	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not going to be a front door?  MR. MCCANTS: No. The front right now, what's existing as the front door is this	1 MR. ILDERTON: All right. Jon? 2 MR. LANCTO: Is the roofing material 3 changing from one section to the other here? 4 MR. MCCANTS: No, no. 5 MR. LANCTO: That's just for 6 illustration? 7 MR. MCCANTS: That's correct, yeah. I 8 was showing only what you see shaded and
2 3 4 5 6 7 8 9	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not going to be a front door?  MR. MCCANTS: No. The front right now, what's existing as the front door is this door right here, and so this will be a door that's	MR. ILDERTON: All right. Jon? MR. LANCTO: Is the roofing material changing from one section to the other here? MR. MCCANTS: No, no. MR. LANCTO: That's just for illustration? MR. MCCANTS: That's correct, yeah. I was showing only what you see shaded and what the texture on it, that's just the new
2 3 4 5 6 7 8 9 10	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not going to be a front door?  MR. MCCANTS: No. The front right now, what's existing as the front door is this door right here, and so this will be a door that's operable, and this will also be a door that's	1 MR. ILDERTON: All right. Jon? 2 MR. LANCTO: Is the roofing material 3 changing from one section to the other here? 4 MR. MCCANTS: No, no. 5 MR. LANCTO: That's just for 6 illustration? 7 MR. MCCANTS: That's correct, yeah. I 8 was showing only what you see shaded and 9 what the texture on it, that's just the new 10 construction.
2 3 4 5 6 7 8 9 10 11	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not going to be a front door?  MR. MCCANTS: No. The front right now, what's existing as the front door is this door right here, and so this will be a door that's operable, and this will also be a door that's operable, which is in the master bedroom now. And the staircase has a landing that comes in here,	MR. ILDERTON: All right. Jon? MR. LANCTO: Is the roofing material changing from one section to the other here? MR. MCCANTS: No, no. MR. LANCTO: That's just for illustration? MR. MCCANTS: That's correct, yeah. I was showing only what you see shaded and what the texture on it, that's just the new construction. MR. LANCTO: Yeah, that's fine. I'm
2 3 4 5 6 7 8 9 10 11	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not going to be a front door?  MR. MCCANTS: No. The front right now, what's existing as the front door is this door right here, and so this will be a door that's operable, and this will also be a door that's operable, which is in the master bedroom now. And	MR. ILDERTON: All right. Jon? MR. LANCTO: Is the roofing material changing from one section to the other here? MR. MCCANTS: No, no. MR. LANCTO: That's just for illustration? MR. MCCANTS: That's correct, yeah. I was showing only what you see shaded and what the texture on it, that's just the new construction. MR. LANCTO: Yeah, that's fine. I'm okay with that.
2 3 4 5 6 7 8 9 10 11 12	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not going to be a front door?  MR. MCCANTS: No. The front right now, what's existing as the front door is this door right here, and so this will be a door that's operable, and this will also be a door that's operable, which is in the master bedroom now. And the staircase has a landing that comes in here, and it's right about at that line, so that can't	1 MR. ILDERTON: All right. Jon? 2 MR. LANCTO: Is the roofing material 3 changing from one section to the other here? 4 MR. MCCANTS: No, no. 5 MR. LANCTO: That's just for 6 illustration? 7 MR. MCCANTS: That's correct, yeah. I 8 was showing only what you see shaded and 9 what the texture on it, that's just the new 10 construction. 11 MR. LANCTO: Yeah, that's fine. I'm 12 okay with that. 13 MR. ILDERTON: Mark?
2 3 4 5 6 7 8 9 10 11 12 13	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not going to be a front door?  MR. MCCANTS: No. The front right now, what's existing as the front door is this door right here, and so this will be a door that's operable, and this will also be a door that's operable, which is in the master bedroom now. And the staircase has a landing that comes in here, and it's right about at that line, so that can't be a door. And it's existing now as a window, but	MR. ILDERTON: All right. Jon?  MR. LANCTO: Is the roofing material  changing from one section to the other here?  MR. MCCANTS: No, no.  MR. LANCTO: That's just for  illustration?  MR. MCCANTS: That's correct, yeah. I  was showing only what you see shaded and  what the texture on it, that's just the new  construction.  MR. LANCTO: Yeah, that's fine. I'm  kay with that.  MR. ILDERTON: Mark?  MR. HOWARD: I'm having a little  harder time getting around it. I understand this
2 3 4 5 6 7 8 9 10 11 12 13 14 15	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not going to be a front door?  MR. MCCANTS: No. The front right now, what's existing as the front door is this door right here, and so this will be a door that's operable, and this will also be a door that's operable, which is in the master bedroom now. And the staircase has a landing that comes in here, and it's right about at that line, so that can't be a door. And it's existing now as a window, but in the past, it was a door.	MR. ILDERTON: All right. Jon? MR. LANCTO: Is the roofing material changing from one section to the other here? MR. MCCANTS: No, no. MR. LANCTO: That's just for illustration? MR. MCCANTS: That's correct, yeah. I was showing only what you see shaded and what the texture on it, that's just the new construction. MR. LANCTO: Yeah, that's fine. I'm okay with that. MR. ILDERTON: Mark? MR. HOWARD: I'm having a little harder time getting around it. I understand this
2 3 4 5 6 7 8 9 10 11 12 13 14 15	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not going to be a front door?  MR. MCCANTS: No. The front right now, what's existing as the front door is this door right here, and so this will be a door that's operable, and this will also be a door that's operable, which is in the master bedroom now. And the staircase has a landing that comes in here, and it's right about at that line, so that can't be a door. And it's existing now as a window, but in the past, it was a door.  MR. ILDERTON: All right. Is there	MR. ILDERTON: All right. Jon? MR. LANCTO: Is the roofing material changing from one section to the other here? MR. MCCANTS: No, no. MR. LANCTO: That's just for illustration? MR. MCCANTS: That's correct, yeah. I was showing only what you see shaded and what the texture on it, that's just the new construction. MR. LANCTO: Yeah, that's fine. I'm was was with that. MR. ILDERTON: Mark? MR. HOWARD: I'm having a little harder time getting around it. I understand this looking as a separate unit is the design concept.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions?  MR. HOWARD: So the front door is not going to be a front door?  MR. MCCANTS: No. The front right now, what's existing as the front door is this door right here, and so this will be a door that's operable, and this will also be a door that's operable, which is in the master bedroom now. And the staircase has a landing that comes in here, and it's right about at that line, so that can't be a door. And it's existing now as a window, but in the past, it was a door.  MR. ILDERTON: All right. Is there any public comment to this application?	MR. ILDERTON: All right. Jon? MR. LANCTO: Is the roofing material changing from one section to the other here? MR. MCCANTS: No, no. MR. LANCTO: That's just for illustration? MR. MCCANTS: That's correct, yeah. I was showing only what you see shaded and what the texture on it, that's just the new construction. MR. LANCTO: Yeah, that's fine. I'm was with that. MR. ILDERTON: Mark? MR. HOWARD: I'm having a little harder time getting around it. I understand this looking as a separate unit is the design concept. MR. MCCANTS: That's right. MR. HOWARD: But I don't know. I
2 3 4 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions? MR. HOWARD: So the front door is not going to be a front door? MR. MCCANTS: No. The front right now, what's existing as the front door is this door right here, and so this will be a door that's operable, and this will also be a door that's operable, which is in the master bedroom now. And the staircase has a landing that comes in here, and it's right about at that line, so that can't be a door. And it's existing now as a window, but in the past, it was a door.  MR. ILDERTON: All right. Is there any public comment to this application? (No comments.) Public comment section is closed.	MR. ILDERTON: All right. Jon? MR. LANCTO: Is the roofing material changing from one section to the other here? MR. MCCANTS: No, no. MR. LANCTO: That's just for illustration? MR. MCCANTS: That's correct, yeah. I was showing only what you see shaded and what the texture on it, that's just the new construction. MR. LANCTO: Yeah, that's fine. I'm doay with that. MR. ILDERTON: Mark? MR. HOWARD: I'm having a little harder time getting around it. I understand this looking as a separate unit is the design concept. MR. MCCANTS: That's right. MR. HOWARD: But I don't know. I thought this would look better that concept
2 3 4 4 5 6 7 8 8 9 10 11 12 13 14 15 16 17 1B 19	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions? MR. HOWARD: So the front door is not going to be a front door? MR. MCCANTS: No. The front right now, what's existing as the front door is this door right here, and so this will be a door that's operable, and this will also be a door that's operable, which is in the master bedroom now. And the staircase has a landing that comes in here, and it's right about at that line, so that can't be a door. And it's existing now as a window, but in the past, it was a door.  MR. ILDERTON: All right. Is there any public comment to this application? (No comments.) Public comment section is closed. Randy, anything to add?	MR. ILDERTON: All right. Jon? MR. LANCTO: Is the roofing material changing from one section to the other here? MR. MCCANTS: No, no. MR. LANCTO: That's just for illustration? MR. MCCANTS: That's correct, yeah. I was showing only what you see shaded and what the texture on it, that's just the new construction. MR. LANCTO: Yeah, that's fine. I'm okay with that. MR. ILDERTON: Mark? MR. HOWARD: I'm having a little harder time getting around it. I understand this looking as a separate unit is the design concept. MR. MCCANTS: That's right. MR. HOWARD: But I don't know. I thought this would look better that concept works better in a more urban setting, just more
2 3 3 4 4 5 6 7 8 8 9 10 11 12 13 14 15 16 17 18 19 20	what we're going to do is it's going to look like a door, but it's just going to be a fixed panel there.  Any questions? MR. HOWARD: So the front door is not going to be a front door? MR. MCCANTS: No. The front right now, what's existing as the front door is this door right here, and so this will be a door that's operable, and this will also be a door that's operable, which is in the master bedroom now. And the staircase has a landing that comes in here, and it's right about at that line, so that can't be a door. And it's existing now as a window, but in the past, it was a door.  MR. ILDERTON: Billy, why don't you	MR. ILDERTON: All right. Jon? MR. LANCTO: Is the roofing material changing from one section to the other here? MR. MCCANTS: No, no. MR. LANCTO: That's just for illustration? MR. MCCANTS: That's correct, yeah. I was showing only what you see shaded and what the texture on it, that's just the new construction. MR. LANCTO: Yeah, that's fine. I'm was with that. MR. ILDERTON: Mark? MR. HOWARD: I'm having a little harder time getting around it. I understand this looking as a separate unit is the design concept. MR. MCCANTS: That's right. MR. HOWARD: But I don't know. I thought this would look better that concept works better in a more urban setting, just more tity, but so I don't know other than the design you've done is fine. It's certainly

1 isolated lot, I'm not sure that you need 2 separate -- or this much separation.

MR. MCCANTS: Well, I'm trying to

4 differentiate between the historic structure and 5 the new construction.

MR. HOWARD: That's what I thought in 7 the long run, but I'm hoping that's a wise

decision.

9

10

16

20

MR. MCCANTS: Okay.

MS. SANDERS: So are you confused that 11 the exterior finishes are the same?

MR. HOWARD: Well, this is the 12

13 design -- do you know is there a term for this

14 concept of two different architectural designs?

15 MR. MCCANTS: Not necessarily.

MR. HOWARD: I don't know if there's a

17 term for it, but I'm just wondering - 1

18 understand what you're saying, this sets back.

MR. MCCANTS: It does, 19

MR. HOWARD: And we're going to have

21 the historic structure sort of set on its own.

MR, MCCANTS: That's right. 22

MR. HOWARD: And so we're not trying 23

24 to compete with it.

MR. MCCANTS: That's right.

MR. HOWARD: But I just -- like I say. 2 my thought was I think that works better in a city

3 environment where we've got this open lot. I'm

4 just not sure, and so I've got a question. It's

5 just something I want to see, watch and see how

6 this thing goes. I don't know if anybody else on

7 the board had that concern, but that was my

8 concern.

9

20

25

MR. ILDERTON: Rhonda?

MS. SANDERS: The exterior finishes 10

11 are similar?

MR. MCCANTS: No. The exterior 12 13 finishes are going to be -- on the new structure

14 is going to be HardiePlank Artisan. It's going to

15 be a thick material. It's not going to be wood

16 like it is on the historic house.

MR. ILDERTON: But it will be cladded? 17 18

MR. MCCANTS: Yes.

MR. ILDERTON: It would look the same? 19

MR. MCCANTS: Yes, other than the area

21 on the back of the house on the backvard that

22 encloses the bathroom, the master bathroom on that

23 second floor, and that's going to be a board and

24 batten feature there.

MS. SANDERS: I guess what I'm saying

Page 16

Page 17

Page 15

1 is I think your concern is that these look

2 different because they're drawn differently,

3 they're shaded different, but I don't know that

4 they're considerably different.

MR. HOWARD: No. I think the design 5

6 is to make it look different. If you look at the

7 handrail, for example, I mean, this is steel

cable, so this is to make it look like a more

9 modern structure, separate and apart from the

10 historic cottage.

MR. MCCANTS: And that's the intent.

MR. HOWARD: And I think that's the 12

13 goal of the design. 14

MR. MCCANTS: That's right, that's

15 correct.

11

19

20

21

MR. HOWARD: So it's a matter of

17 whether -- I was just wondering if that was

18 worthwhile or not.

MS. SANDERS: Eclectic.

MR. ILDERTON: We're good?

MS. SANDERS: I'm good.

MR. ILDERTON: Steve, do you want to 22

23 jump in?

MR. HERLONG: Well, I'm strugalina

25 with it. I mean, I look at that neighborhood, and

1 I see a lot of gabled roof structures. You know,

when I look at the site plan, there's -- I'm not

3 even sure that there's a reason.

I mean, there's a way to -- with such

s a large lot, there has to be a way to do an

6 addition without the need for that setback relief

7 with all of that room, and I am just -- I keep

e thinking it's not truly -- well, the term we use a

9 lot -- compatible with the historic structure

10 that's there.

It just confuses me a little bit when 11

12 I look at this structure as a one-and-a-half-story

13 structure, just nicely proportioned, and here

14 we've got a two-story wall on the new structure

15 with a hip roof, a broken hip, when we've got a

16 12/12 gable over on the historic structure, so I

17 just -- it just confuses me, and I'm not sure it's

18 the right thing to do immediately adjacent and

19 attached to the historic structure.

MR. ILDERTON: I think the hip sort of 20 21 throws me off too. And like I say, I don't think

22 there's any way to make -- I guess this is a

23 12/12, the original one. I mean, I don't have a

24 problem really with the contemporary aspects of

25 the house. I can see the idea of making them

different. That's done downtown a lot, in
downtown Charleston, with the additions and all
made dramatically different. So I don't have a
problem with the contemporary aspect of the -some of the ideas being contemporary and all, but
the -- I guess the hip is throwing me off a little
bit.

And then I don't know, you know. And like you say, it may be -- might be the drawing.

It just looks a little bulky the way it's on there, but there may be a way to leave it in place and just change rooflines or something so there's -- I don't know.

Or I guess they want to have -- I
mean, I guess the idea is they want to have some
sort of Jasper presentation, as opposed to setting
this structure sort of to the side or back and, I
mean, behind this structure. I mean, this sits on
the lot -- I mean, the house itself pretty much
sits not at center, but not really over to one
side completely on the lot, and maybe they need -because it needed to be there because of the flow
or something of the house. I don't know.

MR. MCCANTS: Well, yeah. We're tucking it over to the side -- well, for one

thing, it's a garage on the back side of it, and
secondly, we don't want the garage to block the
back porch. These folks seem to be living in the
backyard, not up on Jasper Boulevard. So if we

take it and we push it over farther, we're going
to end up blocking off the area, figure out more
living space.

So as it is now, you can see that the garage is already encroaching into the great room area, so by taking and pulling it over to where we're compliant with the setback, it's going to further block that great room off.

MR. ILDERTON: I mean, I really don't

further block that great room off.

MR. ILDERTON: I mean, I really don't have -- the setback is not the issue. I'm really -- to me, I wouldn't have a problem granting the setback if it just -- if I felt better about it architecturally, quite frankly, I mean, to me, and I guess it's either I'm not seeing it right or something. Anyway, I guess we need to talk about it a little bit.

Duke, do you want to jump in?

MR. WRIGHT: Are you going to punt?

MR. ILDERTON: Well, right now, yeah.

We're all punting right now, so we're not sure.

MR. WRIGHT: I think I have a little

Page 20

Page 21

Page 19

bit of trouble with it, too, and I'm not sure what
it is. It seems to me as though in the past, we
have tried to make additions to historic
properties compatible with the existing property,
rather than make it different, and that's one of
the issues that I have with it. I'm okay with the
property itself, but just the exterior design is
confusing to me, I think as it is to others.

property itself, but just the exterior design is
confusing to me, I think as it is to others.

And I'm okay. I guess we've struggled
a little bit with whether or not we should go
along with HardiePlank on historic structures or
additions to historic structures where the
structure itself, the wood -- I've looked at it
somewhat, and it's pretty good siding on the house
now, I think.

MR. MCCANTS: Yes, sir. No, we're not changing that. It's a new structure. And the Hardie Artisan is the same thickness.

MR. WRIGHT: And it maybe even looks like it. I'm okay with that.

How about the windows? Are they going to be 12-light windows, the new windows, to match the existing windows?

MR. MCCANTS: No, sir.
MR. WRIGHT: No? I'm not sure that

wouldn't be nice. And the same way with this
stairway over here, maybe rather than go
contemporary, match the existing porch railing and
whatnot. It's just -- it's interesting. I don't
have any trouble with the addition; I think it's
just some of the details of the design.

MR. MCCANTS: Well, let me pose this
to y'all, because if we were to take and do the
same pitch roof that we have on the existing
structure on that, that structure's going to look
even more massive. And one of the theories for
doing the hip roof on this was that it would -- it

wouldn't present as massive by having a large
gable at the end. And I think it would overwhelm
the other house if we had that large gable at the
end.
And so if you try to look at this on a
people scale, rather than flat elevation like
you're looking at now, you're not going to see

much of that roofline. You know, what you're
going to be seeing is overhang brackets, and
that's -- hopefully, the roofline's going to
disappear, and that's why it's done as a hip roof.

MR. HERLONG: The way I see this -and I agree with Pat. I almost never have any

24

6 with that.

25

Page 22

trouble with granting setback relief when it seems
to be the right thing to do. In this case -- and
I also agree that an addition could be a more
contemporary -- stylistically more contemporary
than the historic structure. I have no trouble

But I think here the existing home is
a smaller scale than this larger two-story
addition, and you're kind of masking it by putting
the lower hip roof on it. It just -- the scale of
the addition, as it's currently set up in general,
just seems to be a little overwhelming to the
actual historic house. That's all.

MR. CRAVER: I have a question here.

MR. CRAVER: I have a question here, because this seems to come up every once in a while, and that is the difference between whether they have met the requirements of the ordinance, and then when it gets into our applying --

Y'all didn't ask me if I liked the
design. You just asked me whether -- what I
thought about it, and I think it meets the
requirements, and so I was -- I'm willing to
approve it. I think it's a shitty design, but

MR. ILDERTON: I think we're here to

s 1 critique the design and whether it's

<sup>2</sup> architecturally appropriate or not. We're not

3 here to just enforce an ordinance. We're here to

4 say do we like the design or not.

5 MR. CRAVER: I'm not sure that we are.

6 I mean --

MR. ILDERTON: I mean, that's what the design review board's about, I mean, as far as it's much, much more about that than it is about

10 do they meet the --

MR. HERLONG: In this instance, however, if this was an existing addition that was not historic, I don't think we'd be having this

14 discussion. The fact is this is a historic

15 structure, so they need more of our attention, in

my opinion, and I think that's generally been the board's view. Because it's historic, I think we

18 owe it to the town to make sure that we're not

19 adversely affecting that historic structure with

20 the addition.

MR. CRAVER: So what is the standard that we're applying, then, to judge --

MR. HERLONG: There are actually -- 24 weren't there like eight standards in the

25 ordinance that you'd need to --

Page 24

Page 25

Page 23

MR. LANCTO: We need to look at it on a compatibility issue here, and not just with the existing structure, but with the whole neighborhood. And if it was a stand-alone

structure, then we wouldn't be having -- like what

6 we said here, it wouldn't be a problem, but the 7 fact that it is attached to this structure, is it

s compatible with this structure, and in further

9 looking at it and hearing the comments, I don't

10 think it is. I don't think it's compatible with 11 that structure.

MR. CRAVER: What is the compatibility issue? Is it a compatibility -- the size and massing or --

MR. ILDERTON: Yeah. I think the size and massing is the main difficulty.

MR. CRAVER: I want to make sure we give them good input.

19 MR. ILDERTON: I mean, I think — for 20 instance, I don't know that they would want to do 21 this, but like if that master bedroom area was on 22 the same level or a little bit lower, so it's

not -- and the garage area was another addition or something like that. I know there's a cost issue

25 that the owners, I'm sure, are worried about as

1 far as building a separate structure for the

2 garage area and stuff, but anyway, it's --

3 MS. SANDERS: So are you suggesting if

4 they looked like they were separate structures
5 instead of attached, more like in a breezeway

s instead of attached, more like in a breezeway,
that it would be more acceptable, or just that

7 it's not all together?

MR. ILDERTON: I think it's too

nassive, basically. I just think it's too massive

10 for this house. That's my - that's what I'm 11 looking at, the way I --

MS. SANDERS: And I think part of the is issue --

MR. CRAVER: So is it not -- it's not the square footage, it's the --

MR. ILDERTON: I don't have a problem with the square footage.

MS. SANDERS: It's a straight wall.

MR. CRAVER: That's what I'm -- I just

want to make sure we give good direction and - MS. SANDERS: And I think like just

looking at it straight on, maybe the drawing's alittle bit deceiving, because you're trying to

24 show the original, which makes it obvious that

25 it's original, but you don't see the siding and

7

the roofing, so it looks like it's totally
different, which it may not be, so I think it
might be partly presentation.

MR. WRIGHT: Well, there is a large cedar tree there that masks --

6 MR. MCCANTS: And oak trees and all.
7 You won't see much of it.

MR. WRIGHT: This is from Jasper. If anybody walked around and looked at it, there's a tremendous cedar tree. It's shown here on the plat.

But I think detailing -- again, I go
back to the question as far as are we concerned
about the addition being incompatible with the
existing house, which is a 100-year-old structure.
I think it's a very valuable asset to Sullivan's
Island. Are we concerned about this addition
taking away the value of that historic structure,

rather than adding to it?

MR. HERLONG: Well, it's my opinion
that it confuses -- it's a confusing -stylistically confusing full property and not
necessarily -- maybe the term might be respectful
of the historic structure, original structure, the

25 historic front part and then that little smaller

1 wing on the back. I think the scale of this

2 addition should be broken down more so that it

3 shows the original structure as the main

4 structure, and that's just very subjective.

5 There's no way to say -- I can't say what would be

6 done, but that's just my opinion.

MR. MCCANTS: Well, Steve, in essence,

g if you look at it, this structure is set back well

9 beyond the main body of the house. The main body

10 of the house -- the front of the proposed new

11 addition is 16 feet past the back of the new

12 house, so it's not that it appears that it's going

13 to be even attached to it. It's going to appear

14 more as a background building, and that was the 15 intent.

MR. HOWARD: Well, I could say even some of these changes, not just the addition itself, but -- I mean, there's some changes to the back of the original structure that actually upgraded or updated, but changed the overall atmosphere of the rear. It does bring the rear of

MR. MCCANTS: Well, if you look at it now, the addition that's been added onto it is a

22 the historic cottage almost a very modern setting.

25 big -- I don't know what you call it -- sunroom

Page 28

Page 29

Page 27

full of big sliding glass doors that's on the backof it now.

MS. SANDERS: Not historic.

MR. MCCANTS: Correct. And all that -- that section's all being removed.

mat -- that sections all being removed.

MS. SANDERS: So that would be a vastimprovement.

MR. HOWARD: Well, what are we -- are these sliding? Are these just French doors?

MR. MCCANTS: The doors that are on there now would be French doors, yeah.

MR. ILDERTON: I think -- I mean, it seems to me you could possibly keep the same

13 seems to me you could possibly keep the same 14 footprint and even the same layout if you change

15 the roof structure a little bit and dropped it

16 down with some -- I don't know. I don't know if 17 that's possible. I don't know if that's -- you've

18 already dropped it down some. You've already

19 dropped the roof down some, but --

MS. SANDERS: Similar dormers?
MR. ILDERTON: Yeah.

MR. MCCANTS: Right, because it's --

well, you know, we have a garage underneath it, so that's where it's raising that up.

MR. ILDERTON: Yeah. That's the

problem. I mean, the garage is the problem. I
mean, the garage is making a problem.

3 MR. MCCANTS: Sure.

MR. ILDERTON: Not that I object to a

garage, but -- because the garage is making it
more massive and taller and everything else.

7 MR. MCCANTS: Well, you know, if you a look at it from the street side, we've got the

s transition of the one-story element on the new

10 area that ties in with the historic structure, and

then when you step back beyond that is when we hit

the two-story element. So we've worked trying to

achieve some kind of transgression, rather than it

not being just a massive two-story building on thefront of it.

And again, it's set back well beyond the front facade of the historic building, as well as set back beyond the back of the historic building.

MR. ILDERTON: Your side windows are at one level in there, and your front — and that front dormer window is another several feet higher.

MR. MCCANTS: Yeah, that is correct, and it was to get enough fenestration on that

1 front view.

MR. ILDERTON: I mean, it seems to me 3 you could drop the whole roofline down several 4 feet and let some of those windows in the master 5 area and all come up into the --

MR. MCCANTS: Well, then it would 6 7 intersect with that front shed that we have. MR. ILDERTON: Well, I'm just saving 9 the shed's awful high. It's a lot higher than 10 those windows. I mean, the shed -- I'm not sure 11 what that shed's doing, but it's a lot -- your 12 windows are a lot higher, and I'm not sure what 13 that dormer window -- it looks like it's going to 14 be -- I mean, it's going to be a lot higher than

MR. MCCANTS: It is. 16

15 the rest of the windows.

MR. ILDERTON: And I don't know why 17 18 that needs to be that way.

MR. MCCANTS: I mean, it could be just 19 20 completely eliminated, but it would make that 21 transition pretty odd.

MR. ILDERTON: I mean, you could 23 get -- I mean, you could make the roofline -- I 24 mean, you could drop the whole thing lower by 25 doing some things, I mean, without -- I mean,

1 still getting your garage and things like that.

And the garage looks -- I mean, why --

3 it looks like the garage is -- that's 8 feet, and

4 3 feet before you hit the ceiling of the garage.

5 I mean, is the garage like 11 or 12 feet tall when

6 you drive into it? It's going to be really --

MR. MCCANTS: No. no. If you look at

8 the first-floor plan, you'll see that you step

down into the garage.

MR. ILDERTON: 8 feet here, but, I 10 11 mean, that looks like it's --

MR. WRIGHT: You're going to be 12 13 another 3 feet.

14 MR. ILDERTON: I understand. It's 15 pushing the whole thing up. It's just making 16 it -- I mean, I don't know that it needs to -- I mean, do you need that much extra footage? You 18 know, I don't know.

MR. HERLONG: I look at the basic 19 20 scale of the historic structure that sits closer 21 to the ground, and it's almost like just my gut tells me do an addition that's a master suite 23 somewhere and then do a garage that's somehow

24 connected and break it up. It's just like there's

25 too much mass trying to happen right adjacent to

Page 32

Page 33

Page 31

1 that house, and it's just throwing everything out 2 of scale. That's what I'm seeing about it

3 that's -- it's almost impossible to be able to

4 architecturally control that addition.

MR. WRIGHT: Is it too much to ask --

Were you done, sir?

5

MR. HERLONG: The only other issue I s have is that when I look at the Goldbug side of

9 the house, that bath, master bath, is hanging up

10 in the air, and so the -- even though that side.

11 it's off of Goldbug, it's just -- it just seems to

12 conflict with the historic portion of the house in

13 a lot of ways, and I don't know how you resolve it 14 without rethinking some issues there.

MR. WRIGHT: Have you looked at this 15 16 addition being directly at the back of the house 17 as opposed to the side of the house? I think 18 that's where you're going with this. I think I 19 am.

MR. HERLONG: However, I understand 20 21 the dilemma. You want to open up -- the house has 22 views in the backyard, and that's what you want to preserve. It's just that there may be other

24 solutions that are more respectful of that

25 historic house, in real general terms. That's all

1 I'm savino.

MR. CRAVER: I hear what you guys say,

3 and I think what I don't like is the appearance on 4 the outside, maybe it's what appears to be

5 different roof materials, but other than that.

6 looking at the design of the house on the

7 inside -- and if they have to -- if he has to

break it up and link it together and everything.

9 he loses the whole effect of the great room, the

porch opened up to the existing part of the house.

11 And, I mean, they ought to be able to do that, so,

12 I mean, we shouldn't say that any time anybody

13 wants to do something with a historic house, they

14 got to do a link or something. They ought to be

15 able to make the mass bigger as long as it works,

16 SO is it --

17

MR. ILDERTON: But it's not working. MR. CRAVER: Well, but is it the

18 19 garage being there that makes the mass too much?

MR. ILDERTON: I don't know. It seems 20 21 like you say --

MR. HOWARD: You said: I think this 22 23 is a bad design.

MR. CRAVER: I said I don't like it. 24 25 I didn't like it initially. Now that I look at it

1 more, it was the -- I think it's the roof 2 materials, and it just looked sort of odd. just 3 looking at it.

But I'm looking at the inside, and I 5 go, okay, why shouldn't he be allowed to add to 6 this historic structure and accomplish that? And 7 so if we say he ought to be able to accomplish s that, what is it that this board can say you need 9 to do in order to get our approval? Is it -- is 10 it the massing of having the garage there that 11 creates the problem? I'm just ---

MR. ILDERTON: I think we've said --1.2 13 we sort of said -- what I've said and Steve said. 14 and I think everybody has had a reservation, and 15 we can't say exactly how to design it -- that's 16 not our job -- but I think we've stated our 17 reservations with -- in some measure.

Do we want to take a vote on it? MR. LANCTO: We have to have a motion 19 20 in order to --

MR. CRAVER: I make a motion that we 21 22 approve it as submitted.

MR. ILDERTON: Do I hear a second? MR. CRAVER: Well, evidently, that 24 25 didn't fly.

December 19, 2012

MR. LANCTO: I make a motion we deny 2 it.

MR, ILDERTON: Do I hear a second? 3 MR. CRAVER: Let's think hard about 4

s denying it, because denying it has implications.

MS. SANDERS: I still go back to I 6

7 think the drawing's a little bit deceiving. I

8 understand everybody's reservations, but again, if

• this were shaded similarly to how it is to this,

10 it may look differently. And I realize the side

11 looks very flat without any -- which is probably

the issues that might conflict with the design 13 review, but -- so what is the solution? What is

14 the solution?

15 MR. ILDERTON: I mean, one thing -- I mean, I don't know. Randy, if it's denied --16 MS. SANDERS: What are the issues? 17 MR. ILDERTON: If it's denied, is 18

19 there a time limit? Can they come back maybe next month? 20

MR. ROBINSON: He can come back next 21 22 month with a different design. That's not a problem.

MR. ILDERTON: So there's no real -24 25 MS. SANDERS: I guess my guestion is

Page 36

Page 37

Page 35

1 what exactly are we suggesting is not compatible? 2 What has to change? What needs to change? Does 3 this need to match this?

MR. ILDERTON: Again, we don't need to 5 say exactly what needs to change. That's not our 6 job. It's not our job. We need to express our 7 reservations more than anything else.

MS. SANDERS: But this structure needs to respect the historic?

MR. ILDERTON: Yeah, the massing. 1 11 think the main thing is just it's just so massive. 12 That's my biggest objection.

MS. SANDERS: It's massive; it's not 13 14 that they match.

MR. ILDERTON: It's not because it's 16 contemporary or that it's got contemporary aspects 17 to it. That's my take on it. Now, that may be 18 other folks on the board's reservation, but my 19 take on it personally, as a member of the board,

20 is it's just -- it just overwhelms the --MS. SANDERS: So if it were behind it, 21 22 facing the other street, it wouldn't be an issue? MR. ILDERTON: I don't know about that 24 either. I mean, you know, if it's the same 25 structure and you just move it over, I don't know 1 that that would really work or would they want to

2 do that, and I wouldn't suggest that. That's

3 not -- I wouldn't say that. I think it's just the

massing is just too -- it's just fairly massive.

And I really don't understand the 5 6 height, why it has to be that high. I'm still not 7 seeing -- I'm seeing a garage that's like 11 or

12 feet tall and then a whole 'nother living area

above that, unless I'm looking at the plans wrong.

10 and I don't know why it needs to be that -- what's 11 going on there.

MR. CRAVER: If the garage were not 12 13 there, if it were just not there at all --

MR. ILDERTON: That would make a huge 14 15 difference.

MR. HOWARD: Well, I think that's one 16 17 of our first options that we're giving you. I 18 think the board would actually -- sounds like

19 they'd be happier with an addition onto the home 20 and a separate garage.

MR. ILDERTON: Architecturally, there 21 22 may be a way to keep the garage there as well as 23 having the master suite above the garage. So I'm 24 not saving there isn't, you know, there may be. 25 but making it — you know, it's just the massing,

Min-U-Script®

1 you know. So I don't want to say you can't have a 2 garage underneath it. I mean, I don't think --

3 that doesn't -- it may work that way. Personally.

4 that's what I'm speaking of from my point of view. MR. WRIGHT: Would a three-dimensional

6 or a model --

MS. SANDERS: 3D, yes, that would 7 help.

MR. WRIGHT: Would that give us a 10 better feel for the massing of what we're talking 11 about here?

MR, ILDERTON: I don't know that we 12 13 can require that.

MR. WRIGHT: No, but I just -- that 14 15 might be a way to move it on forward. Otherwise. 16 I don't think we -- it seems to me as though the 17 consensus of the board is not to deny it and not 18 to approve it.

MR. ILDERTON: I don't know. We don't 19 20 have that consensus yet, I don't think. We've got 21 a motion on the table, and I guess neither motion 22 was seconded, approved or denied. Well, it's got 23 to go one way or the other, guys, okay. It's got 24 to -- you know, it's got to either be approved or 25 denied or -- I mean, we don't have any other

**December 19, 2012** Page 39

1 choice here, so if we're not going to motion to 2 approve it, then we're going to -- then we hear a 3 motion to deny it. We got to make a choice.

MR. CRAVER: Well, I second your 5 motion. What was your motion?

MR. HOWARD: To deny it. 6

MR. LANCTO: Let me modify the motion

to deny it based on neighborhood compatibility. MR. CRAVER: And would it be like

10 21-111(g), where appropriate, the types of roofs. 11 the roof pitches, other aspects of the roof design

12 or distinctive architectural styles and

13 character -- let's see.

MR. LANCTO: Other factors as the 14 15 board may consider to be relevant.

16 MR. CRAVER: I just have this fear 17 that we're not giving them -- giving him the 18 right ---

MR. ILDERTON: We've got a motion to 19 20 deny based on compatibility. Do I hear a second?

MR. CRAVER: I second that.

MR. ILDERTON: Okay. Now we have 22 23 discussion. We can have a discussion.

MR. LANCTO: And it's a good point to 24 25 give them some guidance at this point.

Page 40

21

Page 41

MR. ILDERTON: Right, right. 1

MR. HERLONG: I would say that we

3 would request the applicant to continue to study 4 the massing and scale of the addition to make it

5 more compatible with a historic structure. I

6 think that's -- period. Because I think that's 7 where the problem lies.

MR. CRAVER: I'm just trying to get --MR. HERLONG: It's not specific, and I

10 don't think it can be any more specific than that.

MR. ILDERTON: It's not our -- we 11 12 can't be too specific. That's not our job.

MR. CRAVER: Yeah, but I think we --

MR. HERLONG: It gives the applicant 14 15 room to go in any direction to try to come back to 16 the board.

MR. HOWARD: Can we ask the architect, 1.7 18 are you getting any feel as to where we want you 19 to go?

20 MR. MCCANTS: Oh. sure. MR. HOWARD: You are?

MR. MCCANTS: Sure. Basically, 22

23 massing and scale seems to be the hang-up, so I 24 get it. And I don't completely agree with all the

25 statements that were said; however, I do know that

1 certain areas of this are massive when you look

2 around the side and the back of it, but, you know,

3 we worked on trying to make it to where it was a

4 background building, so the historic building s stood out from the street, which it will with the

6 way this is set up, but that's fine. You know,

7 this is being brought in as preliminary to go

through to find out what the board thinks about

• it, then to move on and continue with the design 10 work of it.

Now, the problematic thing is, and Pat 11 12 even said it, we're trying to consolidate a garage 13 into this, and now by losing the garage, now we're

14 incurring a lot more cost on my clients by

15 building a separate garage on the property, which

16 we're also going to get into lot coverage issues, because in the future, they're going to want a

18 pool as well, and so the garage is going to eat up

19 some of our lot coverage by not having it

20 consolidated with this. But that's not your 21 concern, is it?

MR. HOWARD: But the board is not 22 23 specifically denying the garage. There is some 24 concern about the roof pitch in the house.

MR. MCCANTS: Sure, sure.

13

		24	I've got to recuse myself on this one.
25	because like, all right, here's a one-story	25	I'm going to turn the floor over to Steve.
	Page 44		Page 45

```
MR. HERLONG: We're on Item No. 4.
 2 2205 Middle Street, a commercial addition.
          Randy, can you explain it to the
 ٦
 4 board?
           MR. ROBINSON: Yeah. 2205 Middle
 6 Street, Station 22 restaurant, is coming to you
 7 for some front to side changes. They want to put
 a front stair on the structure. They're going to
 remove the existing stair that goes up underneath
10 the porch. They want to add some roof changes. I
11 believe some window and door changes to the front
12 of the building. There are interior renovations
13 going to go on. That's not under y'all's purview.
14 I'll be looking at that for compliance with the
15 ordinances and the codes.
16
          One thing to keep in mind here, and
17 it's a little bit -- this property is a little bit
18 different than a lot of properties in that our
19 ordinance states that a property -- a commercial
20 building has to be between 5 and 10 feet -- their
21 front setback can be as close to 5 and no more
than 10, and they can go up to that 5-foot
23 setback, but they need to have a 6-foot walkway
24 out in front of the structure.
```

This structure allows parking right up

1 to the structure, so we have a little different 2 element. The new stairs coming down would be in 3 that walkway, but there is a walkway underneath 4 the porch. And anyway, I've advised the applicant 6 to come up with a good way to define that walkway 7 underneath that porch. It still meets the required setbacks. It's just that they don't have • that walkway out front; it will now have to go 10 under the porch. But I'll let the applicant go ahead 11 12 and present and save any comments for after. MR. THOMPSON: Good evening. I'm 13 14 David Thompson. I'm the architect for the 15 project. I've got my clients with me tonight, 16 Marshall, whom everybody knows well, and Richard 17 Stoney, who's partnered with him. Both of them 18 have extensive restaurant background, Richard with 19 the Boathouse. 20 And my charge from them was to update 21 Station 22 to where it kept its identity, and it's 22 an important part of the community, but upgrade it 23 to be able to compete with other restaurants on 24 the island and recognize changes in the way people 25 eat out. A lot's happened since it's been opened.

1 so a lot of what the design that I'm working on 2 from the inside out is to address that, and that 3 affects the porch.

Like Randy said, there's a large scope 5 of work inside, working from the kitchen back. 6 extensive kitchen renovations, compliance. 7 upgrades for the bathrooms, interior finishes, s pushing us to the bar. Which a big trend right now, whether it's here on the island. Mount 10 Pleasant, even downtown at Fleet Landing, Rita's 11 on Folly Beach, is this sort of indoor/outdoor component of the bar, and that more casual way of 13 eating and drinking kind of spilling out into the 14 public, which you can see successfully at other 15 restaurants on the island, and that's the big push 16 for why we're addressing the stair.

I brought some photos, and I assume 18 that's okay for me to hand out that, correct? 19 Right now, the stair is set back and 20 actually cut out of the porch. It's hard to see. 21 it's dark, and it doesn't give a real clear 22 entrance to where you're supposed to be going, 23 which is a problem when you're trying to be 24 inviting, which is what restaurants are.

So what we've proposed is to in-fill

1 the hole in the floor where the stair currently

2 comes up, which would allow us to position a new

3 bar right there at the facade, to be able to

4 install new windows that could hinge overhead.

5 similar to what the barbecue place has done.

6 similar to what Poe's did years ago, to relocate

7 those stairs to the front of the porch. So the

8 porch is existing. The porch structure remains as

9 is. The stairs would be pushed forward.

And I've put some examples of 10 11 photographs of 15 structures within blocks of this 12 that have not exactly the same, but similar

13 stairs. So it's, in my mind, very

14 coherent/cohesive with traditional and

15 contemporary work on the island as far as the

16 stair arrangement.

One of the other factors in dealing 17 18 with the porch, in trying to make it more 19 inviting, is the light, which is why we're

20 proposing to change the roofline and leave it more

21 open as a truss, to bring more light in, to make

22 it feel a lit bit more -- to increase the volume

23 underneath there, so it doesn't feel dungeon-like.

Also, to increase visibility towards 24 25 the porch. It's not just about the people that

Page 48

Page 49

Page 47

1 are up there. It's kind of the see and be seen. 2 You want to know that people are up there having a

3 good time, and part of that is changing the

4 railing design back to a more traditional, whether

5 that be Sullivan's Island, Edisto, Pawleys, a

6 three-board rail.

Which there are some photographs of a b house that I worked on in Debidue that 9 incorporates very similar rail detailing that 10 allows us to use a three-board in conjunction with 11 cable rail to be able to meet the code. You can 12 see from a distance, the cable rail virtually goes away, but from up close -- there's a photo right 14 at the end -- the detailing of it's nice. I think 15 it's a good solution.

The specifics of the site that Randy pointed out are what the first part of the 18 photographs are. It's interesting, because the pedestrian path, the sequence of how you walk up the block is actually more aligned with what we're 21 proposing. To relocate that six-foot clear 22 walkway beneath the porch actually lines you up 23 better with the rest of the sidewalk and the rest 24 of the businesses along the pedestrian route. In 25 my opinion, it actually makes the walk safer as

1 well, because you're moving the pedestrians away 2 from the nose of the cars.

So those, I think, are the two big 3

4 issues. The third is how do you control that?

5 How do you designate it? We've met with Randy

6 twice. We've met with Pat, who is the building

7 owner, who's supportive of us designating --

a physically designating on the path, that there's

9 not going to be any sort of -- we're not going to

10 get encroachment of furniture or displays, that we

use would have a true designated pedestrian access of

12 6 feet under there, which is actually greater than

13 what exists from face to curb.

So we're increasing it to be

15 compliant, we're realigning the pedestrian path,

we're making the porch more inviting, and we're 17 working within the ordinance.

I could answer questions. I don't

19 know if Richard or Marshall might say anything,

20 but they're willing to answer questions as well.

MR. HERLONG: Do you have anything to 22 add?

MR. STONEY: Not at this time. 23

24 MR. STITH: I've never been this

25 silent in my life. I just had neck surgery, so

14

18

Page 53

Page 50 1 I'm not feeling too hot, but thank you for the 2 opportunity. MR. HERLONG: Okay. So is there any 4 public comment? 5 (No comments.) MR. HERLONG: Public comment section 6 7 is closed. Randy, do you have any final comments? 8 MR. ROBINSON: No. 1 just want to say that this is a special exception, a restaurant is 11 a special exception in the commercial district, 12 and that outdoor patio, porches, and decks are 13 permitted, but it does say that -- there is an 13 14 ordinance, and I believe it's in our noise 14 15 ordinance, that says that the door -- the windows 1.5 16 on this bar will need to be closed at a certain 16 17 time, because it can't be open. And under (e) -- excuse me. Let me go 18 19 back a little bit. Under 21-50(e), it says no 20 outdoor entertainment or speaker system is 20 21 permitted, but you can serve food and drinks out 21 22 on the porch. 22 But I just want y'all to be aware of 23 23 24 those limitations. I have nothing.

1 you have any thoughts that might help the board 2 when it comes to the traffic and parking relative 3 to the stair addition? MR. ROBINSON: I don't think the --5 you know, the parking is going to be -- any 6 parking would be prohibited by this stair system. 7 Traffic shouldn't be affected. You're coming at s it on the existing walkway, provided that walkway is provided under the deck and it is a clear 10 walkway. I mean, whether the walkway's out where 11 the cars are or whether it's underneath the deck, 12 there is a walkway. MR. LANCTO: So is this going to eliminate the parking spots? MR. ROBINSON: No, sir, not at all. MS. SANDERS: I don't see how the 17 stairs are going to fit in there. MR. ROBINSON: The parking will stay exactly the same. MS. SANDERS: I don't see how the stairs are going to fit right there. MR. THOMPSON: There's 5 feet. MR. LANCTO: The cars are parked where 24 the stairs are.

Page 52

25

3 cars are within 3 feet of the concrete block wall 4 line. MS. SANDERS: Yeah. 5 MR. THOMPSON: Is it okay for me 7 to respond? I don't --MS. SANDERS: Sure, absolutely. MR. HERLONG: We're having a 9 10 discussion. MR. THOMPSON: We've talked with Pat 11 12 about that as well. We've all talked about it. 13 It really comes down to an operations. We've 14 talked about two ways that we could deal with 15 that. One is parking blocks, which can be 16 situated and fixed in place, and that's going to 17 help with the overhang. And second would be to 18 look at bollards, and not a commercial Walmart 19 steel-with-concrete kind of bollard. We could do 20 a decorative, simple, wooden bollard that's at the

There's currently just over 5 feet

23 from the face of the column to the curb. The

stair has -- there's extra room with the stair

25 there for where we could attach that.

MR. ROBINSON: There's 5 feet.

MR. LANCTO: But the noses of those

MR. HERLONG: Okay. Any thought -- do

2 stairs? MR. THOMPSON: The width of the stairs 3 4 is approximately 4 feet. MS. SANDERS: Right. So there's a 5 6 foot between the stair and a --MR. THOMPSON: Correct. 7 MS. SANDERS: So unless you're driving a Mini Cooper or a golf cart, you can't park 10 there, if you have a bumper. MR. THOMPSON: No. There's 5 feet 11 12 before you even get to the curb. That doesn't --13 it doesn't -- actually, if we look at the site 14 plan, I might be able to show you better. MS. SANDERS: This one? 15 MR, THOMPSON: So right here, the 16 17 existing columns are there, and cars are parked 18 here. Here's the curb. 19 MS. SANDERS: Like this picture. MR. THOMPSON: Correct. So that stair 21 will fit between there and there if there were parking blocks so that you weren't pulled up to 23 the curb. 24 MR. HERLONG: There's an offset right 25 here that I'm seeing right here, so you've got an

MS. SANDERS: Right.

MS. SANDERS: What's the width of the

21 face of the curb.

22

			December 19, 2012

14	MS. SANDERS: And these aren't even a	14	us to know as we go.
15	Toyota Tundra.	15	MR. LANCTO: I ride my bike down
16	MR. THOMPSON: And there's no parking	16	through here every day, and I'm bothered already
17	blocks. That's what I'm saying. There's nothing	17	by how far the vehicles stick out away from the
18	to control them.	18	front of this building, and if they've got a
19	MS. SANDERS: I know, but if there	19	bumper hitch on them, a trailer hitch, it sticks
20	were parking blocks, then 90 percent of the cars	20	out into the road, and I kind of fear for my life,
21	couldn't park there.	21	because I've got to ride so far out through this
22	MR. THOMPSON: There are some pretty	22	section of town, it's kind of scary for me, and
23	large trucks we looked at it from the porch	23	what you're saying is you're going to stick those
24	part – and they still fit. There's some trucks	24	cars even further out.
25	that are too big that shouldn't be parking there,	25	MS. SANDERS: And it's not like
	Page 56		Page 57
1	they're going to stop parking there.	1	discussion.
2	MR. LANCTO: No, exactly. There is	2	MR. HOWARD: So you're saying on each
١,	nothing you're going to do with a bollard or	3	bollard, put a sign compact car only?

3 nothing you're going to do with a bollard or 4 putting a sign that says small vehicles only 5 that's going to keep people from parking there 6 that have long vehicles. MR. HERLONG: Maybe that's a solution too, though. MS. SANDERS: Parking is obviously an 10 issue everywhere. MR. HERLONG: So maybe that's for 11 12 cars, and trucks need to park somewhere else. MR. THOMPSON: Well, it is a unique 14 situation because half of the parking space is 15 actually on the property, you can see the property 16 line encompasses the parking space, so there is a 17 certain amount of control that the building owner 18 can take over how these parking spaces work.

20 slanted parking or -21 MR. THOMPSON: Well, we don't want to
22 reduce the amount of parking, but we can certainly
23 do some control over what kind of car is parked

MS. SANDERS: Make parallel parking or

do some control over what kind of car is parked
 there. That's the last thing we want to do is
 take the parking away and get into that

bollard, put a sign compact car only? MR. THOMPSON: It would be a solution. 4 MR. WRIGHT: That doesn't do anything. 5 MR. HOWARD: No, it doesn't. 6 MR. HERLONG: Well, if somebody's 7 sticking out past that line, the police could always give them a warning to not park there. MR. LANCTO: We don't want to --10 MR. HOWARD: What are the specs of a 11 standard -- is a standard parking space 18 feet or 13 something? MR. THOMPSON: 18 feet. It's usually 14

MR. THOMPSON: 18 feet. It's usually 15 18 by 9.

MR. HOWARD: 18 by 9. And so when

MR. HOWARD: 18 by 9. And so where you envision the bollard, you have 18 feet?

MR. THOMPSON: Yes. The 18 feet -- I

19 haven't measured it like Steve asked, but I

believe that from curb right now to the white lineis more than 18, because there were some huge

trucks parked out there. So if they were stopping where they're supposed to be stopped, instead of

24 pulling all the way up to the curb, they should

25 still be within a standard parking space.

MR. HOWARD: Well, they only pull up to the curb now to make sure their tail end is out.

MR. THOMPSON: Right, because they can do it.

MR. HOWARD: Correct.

6

MR. THOMPSON: And I would too.

MR. HOWARD: If you say you can put the bollard there, and you still have an 18-foot spacing, then I suspect that would --

MR. THOMPSON: And when we look at the distance of the stair, we're not talking about this entire length of parking here; we're talking about three to four spaces that are affected by the stair.

15 the stair.

16 MR. LANCTO: There's also an overhang
17 into the existing parking in your design that
18 hangs out even further, so if there wasn't a
19 bollard that was in line with that below it -20 MS. SANDERS: You wouldn't be able to
21 park in that one.

MR. LANCTO: A truck with a -MR. THOMPSON: A box truck or
something?

MR. LANCTO: A box truck or anything

packing into that space would, of course, runright into it.

MR. THOMPSON: There is an 18-inch overhang for a bench built into the deck of that which would overhang the curb by about 6 inches.

6 MR. LANCTO: It looks like a lot more

7 than that.

MR. THOMPSON: I don't know how often they get box trucks trying to back in there, but again, I think that's probably not this unique to this proposal. I think that can be handled. I don't know if that's where they should be parking anyway.

MR. LANCTO: It looks like about two-and-a-half feet on your scale.

MR. THOMPSON: That's right. The bench is 18. We could reduce that as much as -- down to 18. I think it is shown as 30 because we've got some relief at the top.

MS. SANDERS: Is there a possibility to consider putting the stairs where y'all have the walkway now, so it's underneath? I mean, instead of going directly in, just moving it back so it's inside the pilings. I don't think it would take too much away.

Page 60

Page 61

Page 59

MR. THOMPSON: It would require us to reframe the entire porch, because that's the way the structural — the beams go all the way out, so if we were to header off, we're going to then incur another set of columns inside, and we're going to have a significantly smaller porch than we started with, which is kind of the whole — the reason for moving those stairs out of there. So it would be an option, but it wouldn't be a desirable one, because that's kind of defeating the point of picking the porch back up as one of the biggest assets of the restaurant.

MR. HERLONG: Why don't we first just

14 go down the line, let everybody talk about any
15 questions or comments or thoughts, maybe
16 aesthetically about the changes or any other
17 conventional issues as well.

18 MR. WRIGHT: Well, I have a -- Randy, 19 this is kind of a rhetorical thing. We've been

struggling with parking here as long as I can
 remember. Whatever happened to the study that was
 supposed to be going on to change the flow and

parking on Middle Street in the business district?Do you remember that issue?

MR. ROBINSON: Yeah, I do.

MR. WRIGHT: Is that dead?
MR. ROBINSON: It's dead.

3 MR. WRIGHT: So we're back to having

4 to deal with reality on these issues?

MR. ROBINSON: Uh-huh.MR. WRIGHT: Thank you.

l don't have any trouble, frankly,

with the design. I think it's a good design for

 $_{\mbox{\scriptsize 9}}$  what's going on, and I think the flow -- in fact,

10 I walked by there last night, just down the

11 street, and it's difficult right now, but I think

this probably improves the flow of pedestriantraffic.

And, of course, it's kind of at the end of town, so to speak. The only thing left to the west is the new shop that is shown on the corner. So I think if we are okay with the parking directly in front, I think I'm okay with it.

MS. SANDERS: I think it looks great.
I think it's a vast -- it's a nice renovation, and
I think it'd be a great idea to spread the stairs
out into the -- like you're talking about.
I do think there is a way to do it
inside the pilings, and I think that you're going

- 1 to -- excuse my French -- piss off a lot of people
- 2 if v'all get that and nobody else gets anything.
- 3 I mean, you set the precedence by putting stairs
- 4 out in parking spaces when there's so many
- 5 restrictions on so many other commercial

6 properties.

25

11

12

13

16

23

24

25

And I think, actually, if you put --

if you could get the stairs in here underneath the

9 pilings, you'd have more traffic coming into your

10 restaurant, just because they're walking through 11 it and into it.

12 I don't know. I don't think you

13 can -- I don't think you can stick them out there.

14 I don't think you can put those stairs out there

15 in the parking. I mean, I'm looking at your

16 picture. I really don't see -- I mean, those --

17 if you build stairs there, they're out into --

18 that's a little car. That's a little car. Liust

19 don't see how you can do that and expect the rest

20 of the commercial people not to want to do the

21 same thing. I mean, you're setting a precedence.

122 I think if you put the stairs underneath the

23 pilings, it accomplishes the same thing. I really 24 do.

MR. THOMPSON: I think it would be

1 difficult to -- well, two responses is 2 structurally, we would have a new porch to do

3 that. The way that the joists work, that would --

4 which is not to say that you couldn't, but it

5 would be a -- it would be a different project

6 then.

The stairs aren't in the parking, and 7

think that's really important is you could go

9 out there today, take the stairs and the porch out

10 of play, and say as the owner of those parking

11 spaces, I want to manage them better and install

12 the parking blocks or install bollards and control

13 the parking separate from the issue that we're

14 presenting, and I think it would clean things up.

15 and it would be an improvement, and we're not

16 displacing, unlike I think other proposals, that's

17 the big issue, and we were sensitive to that, to

18 not displace any parking spaces. We're changing

19 the habit of how people pull in and out,

20 admittedly, but I think for the better.

MR. HERLONG: Let me ask you: This is 21

22 a preliminary or a conceptual submittal?

MR. THOMPSON: We would love to be 23

24 approved and final with --

MR. HERLONG: What I'm getting at is

Page 64

25

Page 65

Page 63

1 if this isn't, if there's another submittal to go,

2 one of the things that would be helpful, then, is

3 to see where that line is and see how it actually

4 affects the parking space and to see to scale that

5 it's sized as adequate parking would be helpful to

6 the board to know that we're not making a mistake

7 and getting four-fifths of a parking space there

and not the whole thing.

MR. CRAVER: Aren't there really three 10 issues here? One is the design, and is it okay.

MR. HERLONG: Right.

MS. SANDERS: Looks great.

MR. CRAVER: So two, is it on their

14 land. It's on their land. Three, does the 15 parking work.

MR. HERLONG: Right.

MR. CRAVER: Randy can confront 18 whether the parking works. But the other issue is

19 I bet they're trying to do this work in January.

20 in their worst time. If we don't give them an 21 approval, then they're not going to get to do it

22 in January, and it's going to screw them up.

MS. SANDERS: Right.

MR. HERLONG: That's a good point.

MR. CRAVER: So if we -- Rhonda, I

1 understand exactly what you're saying, but I think

2 that's something that Randy can go check that out

3 if we were to approve it subject to him verifying

4 that the parking was okay and it works. I mean,

5 I'm good with that. And I don't want to hold them

6 up if that works. I like the design. I think --

7 I think it improves the whole thing.

MS. SANDERS: We also just had a BZA

9 and a DRB, and the town council shoot it all down 10 on Atlanticville and had attorneys come in here

11 and cost taxpayers a lot of money over something

12 that was whatever, so that's all I'm getting at.

MR. LANCTO: I agree. I think that we 14 do all like the design. My only concern is the

15 parking, and the reason is is because I've had a

16 bad experience with it.

And I would need to have -- you know, 18 we've talked with other applicants here about

19 changing the behavior of parking in front of their

20 buildings, and to the best of my knowledge, not 21 one time has any of those come to fruition on

22 changes of behavior. So that's what I'm concerned

23 about is that we'll make the situation of getting

24 down Middle Street worse than it currently is with

25 a long-bed pickup truck with a trailer hitch

_			December 19, 2012
	Page 66		Page 67
1	pulling into this spot, sticking 3 feet out into	١,	would be on the curb. It wouldn't reduce any of
	the road, so		the actual parking space that's still remaining.
3	MS. SANDERS: Can we do away with		But I haven't measured it.
4	those parking spaces?	4	And I think that's a solution we'd be
5	MR. LANCTO: No. I think that would	5	comfortable with is if the parking is compliant,
1 1	be		and if it can be confirmed by Randy with the
7	MS. SANDERS: Make it compact only?	1	proposal, then we could move forward, and if it's
8			not, then at least we know we've addressed the
ر ا	MR. ROBINSON: Well, you're required		roof and the rails and the general appearance, and
1 -	to have a 9-by-18 parking space. That's in the		now we've got to figure out a different stair, but
	ordinance. That is a parking space is 9 by 18.		it would at least let us move forward.
12	MR. CRAVER: That's what I'm saying.	12	I think you're right, either the
1	I think Randy can confirm, the parking spaces		parking space is a parking space or it's not. I
	either work or they don't work.		think we'll I'm confident we'll find out it is,
15	MR. LANCTO: With a bollard, do they		but I'm comfortable with putting that in Randy's
1	still have a 9 by 18?		court to confirm it after the board
1	MS. SANDERS: I already think it's a		MR. ROBINSON: Let me just tell you
17	space, not	17	that the bollard has to be 18 inches inside that
1	•	18	18-foot parking space, so it has I mean, that's
19	MR. LANCTO: I mean, did someone go out and put bollards under where this	19	· • · · · · · · · · · · · · · · · · · ·
	•	20	all specific in the ordinance.
	two-and-a-half-foot projection is out into the	21	MR. LANCTO: Can you verify that?
	existing parking and measure to the white line and	22	MR. HERLONG: Say that again, please?
1	say that there's 18 feet left?  MR. THOMPSON: I have not measured	23	MR. ROBINSON: You'd have an 18-foot
24			by 9-foot parking space, and then it's required to have a bollard that's 18 inches from the end of
25	that parking. Our bollard, what I would propose	25	nave a boliard that's To inches from the end of
	Page 68		Page 69
1	the parking space.	1	overhanging capability.
2	MR. LANCTO: So they're talking about	2	MR. HOWARD: So you'd have to have a
3	a wheel stop, in other words?	3	wheel
4	MR. ROBINSON: Right.	4	MR. ROBINSON: Actually, did I say
5	MS. SANDERS: Which are not there now.	5	bollard?
6	MR. ROBINSON: No. What they're doing	6	MR. HOWARD: I think we're going to
7	now is using the curb as the wheel stop. So, I	7	need both, just to protect yourself.
8	mean, if there is 18 feet from curb to that white	8	MR. ROBINSON: I meant wheel stop.
,	line out in the road, then you could put a bollard	9	MR. HOWARD: You need to stop the
10	18 inches into that, and they'd be okay. If there	10	wheel and then stop the vehicle.
111	isn't 18 feet from that curb to that white line,	11	MR. HERLONG: So are there any other
12	····	12	design or aesthetic issues? Does anybody have any
13	MR. LANCTO: I really don't like the	13	questions aesthetically about the stairs, the
14	idea of a bollard within the 18 when I think of	14	changes to the roofline?
15	bollard, it's different than I want to think of a	15	MS. SANDERS: I think it looks
16	wheel stop.	16	beautiful.
17	MR. THOMPSON: That sounds more like a	17	MR. HOWARD: I like it.
18	wheel stop to me.	18	MS. SANDERS: Looks great.
19	MS. SANDERS: Yeah.	19	MR. HERLONG: So really, is the board
20	MR. HERLONG: I agree the wheel stop	20	saying the only questions are in the parking
1			
21	should be in, but we shouldn't take that out	21	spaces that would be affected? That's the only
21	and the control of the property of the control of	21 22	area?
	with a a vertical bollard should be outside of		ı

25 that much further so they don't have any

25 parking. I'm not comfortable approving that much

1 over into the parking.

MR. CRAVER: I don't think there's any projection over the existing parking. What's happening is the cars right now are protruding into the property.

MR. LANCTO: See this right here?
This is the line, the curb. This black line, this is kind of coming over the existing parking by two-and-a-half feet.

MR. THOMPSON: That's really a luxury part of the design that I think is more perceived from the inside, and if we needed to adjust that or move it, we would be okay with that, but I think that, again, has to do with where does it fall with the line.

MR. HERLONG: Personally, I like the
detail of that coming over, and if it's the
owner's building, if they build it, and somebody
damages it, they have to — it's not a town
problem; it's an individual problem. Owner's
problem, not —

MR. LANCTO: Is it the owner of the
vehicle or the owner of the building's fault?
MR. CRAVER: It depends on whether the
owner of the building can catch the owner of the

1 vehicle.

2

MR. HOWARD: Who has the best lawyer.

MR. THOMPSON: Or the owner of the building hits it.

MR. HOWARD: But I just say the design thing on this, because we're certainly getting everybody likes the design, everybody -- it looks

s like we're going to leave you with as long as you

meet some standard on the parking, but
 design-wise, I think you're going to need a wheel
 stop and the bollard, so I would -- I just want to

say something about can that be architecturally

done that it fits the area and your new porch, that you just don't stick a yellow pipe out there,

but is there something that can be -- take the

architecture into account verse yellow pipe with concrete?

MR. THOMPSON: I'm confident I can design you a good bollard, if we need both. And I don't want one of those in front of one of my projects, and they don't want that either. We could do something creative that would be in

keeping with the look of the porch that would

24 address the problem. And if that -- if we

25 determined that we had to do it, we could submit

Page 72

Page 73

Page 71

sketches back through, and I would be totallycomfortable with that.

MR. HOWARD: Do you need to step in with something?

MR. ROBINSON: Huh-uh.

MR. HERLONG: One question I have. I
think Rhonda raised an issue that we might want to
at least address, and maybe, Randy, you can help
explain. Is there a perception that this board is
granting something that nobody else is — more
than other people have been getting? On the other
hand, I'm thinking we're not giving a variance to
do anything that is beyond the ordinance; we're
working within the existing ordinance to grant
this. Isn't that correct?

this. Isn't that correct?

MR. ROBINSON: You are. You're not giving any variances. I mean, the one thing is the clear pedestrian path underneath. I mean, that is some guidance I'm asking y'all for.

MR. CRAVER: Actually, I really like that. You know, I think it's much better than

what it is now, much safer, much better.

MR. STONEY: As a practical matter, if

you don't mind me saying so, people use that now.

It flows better. When you come off the sidewalk

1 that the town installed on the other end of the

2 block, you would naturally go in front of where

3 Pat has put the art gallery now, and so the

a natural flow through there is underneath our porchnow.

And part of that problem is because
where the old post office was in front of Pat's
art gallery, that's a slope there, and as the two
come together, there's really an uneven surface
there. Ours is squared off on the curb, but that
slope, the asphalt part is like that, and it
really is a little bit sketchy there in the
evening, because it's uneven.

Most people use underneath our porch to go down the street, back and forth, and that's fine with us. I think it will be safer. It's lighter underneath the porch as well, better lighting.

MR. HERLONG: So do you want to try to craft something that we could approve?

MR. CRAVER: Sure. I move that we approve the project as presented, subject to -- only with respect to the parking, subject to Randy confirming that the parking meets the ordinance requirement and -- period, meets the ordinance

	Page 74		Page 75
1	requirement.	1	is if they want to preserve their steps, they'll
2	MS. SANDERS: Second.	2	put some kind of bollard there, a financial
3	MR. HERLONG: Okay. So we can discuss		incentive to do it.
4	that. Is there do we want to clarify that this	4	MR. LANCTO: I can live with that. I
5	is a preliminary or a final?	5	think Steve made the comment it's they're
6	MS. SANDERS: It's final.		overhanging the deck, and it's you know, you're
7	MR. HERLONG: Yeah, I meant final,		at risk.
8	with hammers and nails.	8	MR. HERLONG: Okay. So all in favor
9	MR. STONEY: Billy, you're exactly	9	of the motion?
10	right. That's our target date of January, slowest	10	MR. WRIGHT: Aye.
11	month of the year.	11	MR. ILDERTON: Aye.
12	MR. HERLONG: So is there any	12	MR. HERLONG: Aye.
13	discussion?	13	MS. SANDERS: Aye.
14	MR. LANCTO: Well, I would just want	14	MR. HOWARD: Aye.
15	to make sure that we do end up with bollards and	15	MR. LANCTO: Aye.
16	wheel stops according to the code for the parking	16	MR. CRAVER: Aye.
17	spots, because I think that they will be a better	17	MR. HERLONG: Any opposed?
18	deterrent for big vehicles parking in there and	18	(No opposition.)
19	MR. CRAVER: He read the ordinance.	19	MR. HERLONG: Okay. So we're through
20	it sounded like they were in order to do it,	20	with these items, and we wanted to get Pat and
21	they're going to have that put that there anyway,	21	quickly
22	aren't they?	22	MR. WRIGHT: We have some more
23	MR. ROBINSON: The wheel stops, not	23	business.
24	the bollards.	24	MR. HERLONG: We have one more item of
25	MR. CRAVER: I think the bollard thing	25	discussion, just a discussion item.
	Page 76		Page 77

MR. STONEY: If I can say one thing, I 2 don't know who created this board. MR. WRIGHT: Well, there is a rumor 4 around here. MR. STONEY: Y'all have a harder time 6 than the elected people, I think. Thank y'all so 7 much. MR. ILDERTON: Do we want to have that 9 discussion, or do we want to can it and get out of 10 here? MR. HERLONG: Let's have a real 11

13 MS. SANDERS: No, let's discuss it. MR. HERLONG: Randy, you might want to 14

15 kind of give us a synopsis of what's been 16 discussed regarding one portion of ordinance that 17 happened to be -- one of probably the nicest

18 projects that came through the board and passed 19 tonight used that same section in order to do that

20 addition, so --MR. ROBINSON: Let me go to that 21

22 section so I know. Now, in a residential structure, when 24 you have -- you can have an addition that's 25 attached by unheated space. In other words, you

1 can have two basic separate structures, and they 2 can have an unheated connector going between them. Kind of where we've drawn the line so 4 far has been it basically had a 2-to-1 ratio, so 5 if it was 12 feet long, it was 6 feet wide. There 6 was some ratio in our minds that we used. A project came before y'all a while B back, and it had a much longer connector, one that 9 was up on Breach Inlet. MS. SANDERS: Is that the kitchen 10 11 addition? No? Yes? MR. ROBINSON: No. There's no kitchen 12 in there, does not have a kitchen, because you 14 cannot have a kitchen if you have that unheated 15 connector. You can only put bedrooms in, game 16 room, something like that. You can have 17 bathrooms, but no kitchen. And you have to put a 18 deed restriction on it stating that you will not 19 rent it as a separate dwelling. That went up on Breach Inlet, kind of 20 21 raised some eyebrows. I think one of the problems 22 was it was -- everybody saw it as two separate

23 structures. The connector didn't get put in 'til 24 the last, and I'm not quite sure that it's still 25 complete, but they're working on it right now.

12 discussion.

MS. SANDERS: What makes the connector?

MR. ROBINSON: A roof and a --

MS. SANDERS: It has to be a roof?
MR. ROBINSON: A roof and a deck above

6 base flood elevation, or in some cases going to

 $_{7}$  above base flood elevation, because in some cases,

 $\ensuremath{\mathfrak{s}}$  that's where it's been used, to allow somebody

that has a house down below flood to do an
 addition that is over 50 percent of the value.

And so if you have an unheated
connector that's not physically connected, does
not share the same foundation, it's basically, in
FEMA's eyes, a separate structure, so a lot of
times, that's where this section in the ordinance

is used.

Went to the planning commission. The planning commission mulled it over, had a public hearing. They put that 2-to-1 ratio, no more than

16 feet and a 2-to-1 ratio. They proposed anordinance with that in it, but it also said

22 anything other than that had to go to the design 23 review board.

Town council looked at it. They had some reservation with the ordinance as written by

Page 78 Page 79

1 the planning commission. They had I think Pat and

2 Steve come to a real estate committee meeting.
2 Thoy talked about it a little bit

3 They talked about it a little bit.

And then Steve, either you or Pat, one, talk about what y'all talked about in the

6 meeting. That would be great.

7 MR. HERLONG: Basically, we -- I think 8 we both agreed that it's really something that

it's used in unusual circumstances generally, and
 because of that, if any -- too many restrictions

on that make it not that workable and that the

review board should be the one to make the call as to whether it's appropriate or not was generally

14 what we suggested.

MR. ILDERTON: Basically throwing it back in our laps.

MR. CRAVER: Did town council buy it?

MR. HERLONG: It didn't have a need to
go to the design review board previously. Is that
correct?

MR. ROBINSON: That's correct. If you had, say, a lot that allowed 4,000 square feet, and you had a 2,000-square-foot structure, you wanted to put it 1,500, shoot, even 100 feet away.

25 and put a connector, I couldn't stop it.

Page 80

MR. HERLONG: And so the reason we saw

them was because of something else in the
ordinance, not because of that portion of the
ordinance.

MR. ROBINSON: Correct.

MR. HERLONG: And our suggestion was make any of those -- any time that section's used, tkicks it to a review board situation.

MR. CRAVER: So what's the status of that? Did it pass or --

MR. ROBINSON: Well, no, it hasn't passed yet. Actually, an ordinance hadn't been written and presented to council for first reading yet. That should be done at the next council meeting.

MR. O'NEIL: Regular meeting.
MR. ILDERTON: It's going to be a
pretty small adjustment. It's not --

MR. ROBINSON: But I think there was another thing that came up in that meeting.

MR. HERLONG: What I thought, and I expressed it in the meeting to the real estate committee, is that I think this board would do well to have a yearly like a retreat and go through the projects that have gone through the

1 board.

I can think of some projects that

3 we've approved that I've had a few reservations

4 on, and maybe the one up there on Breach Inlet,

5 that people have reservations about that. So it

6 would be a good idea, so that even new members on 7 the board can get up to speed quicker, and we can

all have a chance to kind of reevaluate some of

9 the things that have been approved over time if we

10 just took an afternoon and had all of the items we

11 reviewed and take a look and maybe get a picture 12 of the completed work or under construction work.

13 I thought that would be very helpful for the

board.MS. SANDERS: We can't go on a tour.

MR. CRAVER: Well, I agree with you,
Steve. My only concern about putting parameters

around a link like that is it takes away a tool
that this board has to try to make something work

that this board has to try to make something work better, and we're creating an artificial

21 limitation that could make it -- if we needed

three more feet and couldn't do it -
MR. ROBINSON: Let me stop you real
quick. The limitation is only for me.

MR. CRAVER: Okay.

5

Page 81

Page 82 Page 83 MR. ROBINSON: The limitation would be MS. SANDERS: Well, it looks like an 2 for me. I could approve it if it had the small 2 accessory structure. 3 attachment. MR. HERLONG: That fact that it's in 3 MR. CRAVER: Okay. Well, there you 4 front has a lot to do with --MS. SANDERS: That's what I'm saying. s go. MR. ROBINSON: And then the objective 6 6 It's like it overtakes --7 was to take it to y'all if it was beyond that. MR. HERLONG: It's in your face right MR. CRAVER: Okay. I'm good with there in the front. 9 that. MS. SANDERS: You can't see the house. MR. ROBINSON: But it was felt that 10 It overtakes the house, so it doesn't look --10 11 the best thing to do is to take it out of my hands MR. CRAVER: It's an odd-shaped lot. 11 12 altogether, and y'all will review any of them, any MR. O'NEIL: It's big and tall, too, 12 13 attachment. 13 Rhonda. MS. SANDERS: So the Breach Inlet MS. SANDERS: It'd be one thing if it 14 14 15 house, so there's usually a house that brings up a 15 was sideways, maybe even, like everybody's doing. 16 new ordinance or something, something people don't 16 It just --17 like, and I think the problem with that one is MR. WRIGHT: I think we had this 17 18 because the accessory structure is in front of the 18 discussion --19 main structure, and it looks like it is --MR. HERLONG: We did. 19 20 MR. ROBINSON: It's not an accessory 20 MR. WRIGHT: -- when it came up 21 structure. 21 because it sits -- you don't have any rear lot. MR. CRAVER: It's not. It's part of 22 You're in the marsh. 22 MR. HERLONG: Correct, correct. There 23 the house. MR. ROBINSON: It's part of the house. 24 were unusual circumstances. 25 It's in the --MR. WRIGHT: I remember. Page 84

Page 85

MR. CRAVER: And I would hate to -- I 2 would hate to react to that one, because it did 3 have unusual circumstances. The chances of our 4 having exactly those same circumstances again are 5 probably nil, but I'd hate to -- I'd hate to react 6 and create an ordinance because of that one that 7 could somehow take away flexibility dealing with 8 the next one. I would make the same decision 9 again on that house because of the issues with 10 that house. MR. WRIGHT: I think you're right. 11 MR. HOWARD: But we're talking 12 construction here and design, and these people who 14 are the designers need an outline. I mean, you 15 can't just leave it that every time this comes 16 up -- and it's not quite unusual. It's starting 17 to come up -- almost every one of these houses 18 seem to have a --MR. HERLONG: I'd rather have the 19 20 flexibility. MR. CRAVER: I'd rather have 21 22 flexibility too. MR. HOWARD: But these people need to 24 know something about --

MR. HERLONG: Well, we had one tonight

1 that asked him to go restudy, and I think he got 2 it. He knows. He does this for a living. He's 3 turned down occasionally, and he gets approved 4 also. MR. CRAVER: And the discussion is 5 6 good. If we don't say anything, if we don't --7 then they get no -- they get no input. MR. HOWARD: This walkway, I mean, 8 9 right now, we can go from 10 feet to 100 feet? MR. CRAVER: Sure. 10 MR. ROBINSON: Well, you could. 11 MR. CRAVER: Sure. 12 MS. SANDERS: Really? 13 MR. HOWARD: I just think you just 14 15 need something with a little more --MR. ILDERTON: We could turn that 16 17 down. You see, it would come before us, and we 18 would say no, that's inappropriate. MS. SANDERS: Would it come before us, 19 20 though? MR. HOWARD: All you have to do is get 21 22 the majority.

MR. HERLONG: Every time that portion

of the ordinance is used, it triggers it coming to

25

23

25 the review board.

Page 86 Page 87 MR. CRAVER: I trust council to MR. HERLONG: There are a lot of 2 appoint people to this board who have the judgment 2 limitations, and there are other parts of the 3 to make those decisions, and I'd rather do that 3 ordinance that come into play very quickly. You 4 than have --4 keep -- to keep some control over what's even MS. SANDERS: A new ordinance. 5 presented, and then the board has a chance to 5 MR. CRAVER: -- limits in the 6 alter it, turn it down, or say it's just not 7 ordinance that would prevent us from coming up 7 compatible. with a good solution. MR. HOWARD: So you don't think just 8 MR. O'NEIL: That's the first time limiting it to just a percentage. 10 I've ever heard Billy say: I trust council. one-fifth/20 percent of the principle building. MR. CRAVER: Yeah. I take that back. MS, SANDERS: We have enough. We have 11 11 MR. HOWARD: Quickly, 12 12 enough. It's complicated enough. But right now, you could do the -- you MR. HOWARD: Because we're saying this 13 13 14 could build a compound out here. If you could is unheated space, right? 14 15 build 5,000 square feet on your lot, we can do it MR. ROBINSON: Uh-huh, 15 16 in five 1,000-foot units. MR. HOWARD: So, I mean, so they're 16 MS. SANDERS: But you can't. 17 putting bedrooms in here that aren't being heated? 17 MR. CRAVER: No. vou can't. 18 18 MR. ROBINSON: No. The connector is MR. ILDERTON: You could if it was 19 not. 19 20 architecturally appropriate and we said it was. MR. CRAVER: It's the link. The link 20 21 which I don't think that's going to happen, so --21 is not heated. MS. SANDERS: And you're also limited 22 22 MS. SANDERS: What I'm not sure makes 23 to lot coverage. 23 sense is that you have to have a link. That's MR. ILDERTON: Yeah. You got lot 24 what I think does not make sense. 24 25 coverage. MR. CRAVER: Well, I'd let them have a 25

Page 88

Page 89

```
2 ain't going to happen.
          MS. SANDERS: I don't mean that. I
 4 mean like --
          MR. CRAVER: Pat's heard that from
 6 people before.
          MR. O'NEIL: Subdivisions.
          MS. SANDERS: I mean, like, for
 9 instance, I have a 65-foot lot, 65-foot lot, 55 on
10 one end. I mean, how do you do a link down --
there's no way to do a link.
          MR. HERLONG: What happens is the lot
12
13 coverage calculations start to limit.
          MS. SANDERS: Right, exactly.
14
          MR. HERLONG: You can't just start
15
16 using all of that property. You'd be over on your
17 lot coverage very quickly. So there's some
18 natural limits that are there that are going to
19 become an issue if things get too crazy.
          MS. SANDERS: So what's the question?
20
21 Do we need a new ordinance?
          MR. HOWARD: Well, we're trying to
22
23 recommend to the board --
```

MR. CRAVER: Yes.

MR. O'NEIL: I was just going to give

1 separate house and put a kitchen in it, but that

```
1 you an update from last night, which is not much
2 news, but somebody -- Randy, Andy, some
3 combination -- drafted a proposed ordinance which
4 would reflect the change that Randy mentioned.
          We would not be incorporating the
5
6 suggested addition that the planning commission
7 recommended, which was the one which established
the proportions of the connector, but we would
9 replace that new section that they wanted to add
with one that simply said that any building that
11 had an attached addition would have to come before
12 the DRB.
          MR. ROBINSON: That's correct.
13
          MS. SANDERS: And that makes more
14
15 sense.
          MR. O'NEIL: And, you know, I think
16
17 Steven had very effectively talked us out of
18 getting into the mathematics of this.
          MS. SANDERS: I agree.
19
          MR. O'NEIL: I will also say that just
20
21 in informal conversations, it would be good for
22 some number of v'all to come to the next meeting
23 when we talk about it, because I think there's a
24 couple of council members that are not completely
25 on board with that.
```

24

Page 90
---------

MR. CRAVER: Kat, can you send us an 2 e-mail and let us know when the next --MR. O'NEIL: Don't take this the wrong 4 way, but we're saying it'll be different than the

5 one at Breach Inlet, because this time we'll make 6 it go before the DRB.

MR. HOWARD: You're talking about a council meeting or your planning committee?

MR. O'NEIL: Council, no, council. MS. SANDERS: So that one did not go 10

11 through the DRB? MR. ROBINSON: Yes, it did.

12

2 that.

17

19

25

MR. O'NEIL: Yeah, it did. That's 13 14 what I'm saying. We need some other argument 15 points.

MS. SANDERS: When was that? 16 MR. O'NEIL: But anyway, I think 18 generally, I think there's an appreciation of the value of keeping it simple, but also having some 20 kind of controls on it, but at the same time 21 giving you and the architect as much leeway as 22 possible.

MR. HERLONG: But to give an example, 24 the first submittal we saw today that was very 25 much in scale, and I think everybody says this is

1 the quintessential Sullivans Island grouping of

2 cottages, that couldn't have been done if you had

3 put a 2-to-1. If that ratio was there, he

4 couldn't have done that, so it's just -- it

5 creates a problem, a restriction that's going 6 to --

MS. SANDERS: The properties are all 7 8 so different. It just -- you just really can't put them all in a formula.

MR. HOWARD: Just out-of-the-box 10 11 thinking, if you don't want to create an ordinance because of just the difficulty of writing, when

13 you're dealing with a separate addition, could the 14 board require a super majority vote?

MR. WRIGHT: I don't think we need to 15 16 complicate this.

MR. HOWARD: I'm thinking that makes 17 18 it simple. You're saying this actually has to 19 approve by five or four.

MR. ILDERTON: Well, anything has to 20 21 be approved by a majority. What do you mean? What are we talking about? 22

MR. HOWARD: I'm talking about a 23 24 higher majority.

MR. ILDERTON: No. That's changing

Page 92

MR. CRAVER: If we get together and we

1 Roberts Rules of Order, and we don't want to do 2 have a quorum, then have to give a Freedom of

25

MR. HERLONG: But again, I thought 3 Information Act notice and --

4 that what we're talking about now is very useful 4 5 and helpful, so everybody understands this 5

6 ordinance and how it's applied, and having a MR. LANCTO: We might be able to

7 once-a-year retreat -- and maybe, Kat, we need eliminate the stenographer, though, right?

в to --We thought about even having it maybe 9

with the planning commission and maybe council, MS. SANDERS: Well, let's just have a 10 11 I'm not really sure, but there's going to be a 11 party and a band.

12 limit to how effective it can be with too many 12 people, but at least for this board to have -going on a field trip to look at some of these 13 MS. SANDERS: I think it would be things. 14

15 helpful to review some properties that did and did MR. O'NEIL: You need minutes, but you 15 16 not work that we've seen. don't need a transcript. 16

MR. HERLONG: Right. I think it would MR. HOWARD: Right. I mean, you need 17 18 be very helpful to this board to do that. 18 that recorded?

MS. SANDERS: What we don't want see MR. HERLONG: Well, let's plan to do 19 20 happen again and why. 20 something maybe in January. And Pat or Kat, you MR. O'NEIL: Steve, that came up last 21 might want to try to get some dates that might 22 night, too, and everybody likes that idea? 22 work out.

MR. WRIGHT: Does that have to be a 23 24 a basic agenda, and we can ask y'all how many --24 public meeting? MR. HERLONG: I think it does.

Page 93

MR. WRIGHT: That's fine.

MR. CRAVER: -- it's a public meeting.

MR. CRAVER: You got to -- I mean, if

it's a meeting, you got to have minutes.

MR. HOWARD: But I thought we were

25 what structures over the past year might have
