Elizabeth Pope
Re: 956 A Middle Street
Sullivans Island, SC 29482

Dear Ms. Pope,

As requested, the following is my condition report for the trees in question at 956 A Middle Street in the Town of Sullivan's Island.

1. 20" Live Oak – B Grade (Good Condition). This tree has a paver/ rock directly adjacent to the trunk (approximately 2' off of the trunk), but does not seem to be affecting the trees health.
2. 11"/18" Hackberry – D Grade (Poor Condition). This tree has large amount of deadwood and is in a steady decline. The tips of this tree show most of the dieback (30%-40%). Most of the leaf growth is internal on the limbs and sucker growth off of the limbs. It is my professional opinion that this tree should be removed.
3. 14.5" Live Oak – B Grade (Good Condition).
4. 14" Live Oak – B Grade (Good Condition).
5. 23" Live Oak – B Grade (Good Condition).

The assessment of these trees was conducted from the ground. No aerial inspection was conducted on these trees. Please let me know if you have any further questions or concerns.

Sincerely,

Forrest S. Evans

Forrest S. Evans.
